SUBJECT INDEX, VOLUME XIII

Acrylic ester polymers, α-substituted, relation between structure and properties, 565
Acrylonitrile polymerization in bulk, kinetics, 329
Allyl acetate, effect of detergent on polymerization, 113
Anomalous flow, kinetics, 279
Association, polymer, 486

Boundary conditions, reverse polymerization processes, 403
Branching of polymers, determination, 583
Bulk polymerization of acrylonitrile, kinetics, 329
Butadiene, crosslinking in emulsion polymerization, 513
  copolymers, second-order transition temperature, 295

Carbon black dispersion, 487
Cavitation and the effect of dissolved gases, 441
Cellulose, hydrolysis, 393
  lattice spacing, 471
Cellulose-ethylamine decomposition product, x-ray study, 193
Cellulose nitrate, melting, 179
Coiled macro ions, theory, 93
Cotton, Egyptian, fine structure, 393
Crosslinking, in emulsion polymerization of butadiene, 513
  polymers, solubility of gases and vapors in, 131
  polystyrene, by ionizing radiation, 410
Crystallization, neoprene, 235

Degradation of long chain molecules by ultrasonic waves, 441
Demixing polymer solutions in a flow field, 21
Denaturation of egg albumin, effect of silicone coatings, 301
Detergent, effect on polymerization of allyl acetate, 113
Diene polymers, microstructure, 229, 321, 325
Dissociation of weak polymeric acids and bases, 69
Droplets in flow field of demixing polymer solution, 21

Egg albumin, effect of silicone coatings on denaturation, 301
Elastic properties of polyvinyl chloride gels, 207
Electrical properties and polymer structure, 565
Electrostatic free energy, polyelectrolyte solutions, 43
Emulsion polymerization of butadiene, crosslinking, 513
Ethoxylin resin adhesives, monolayer studies, 355
Ethylamine-cellulose decomposition product, x-ray study, 193

Flow field, droplets of demixing polymer solutions, 21
Fractionation of polymers, 595

Hydrocarbons derived from *p*-xylene, 3

Infrared, absorption band in polyethylene, 511
  analysis, neoprene configuration, 251
  polyphenylbutadienes, 477
  spectrophotometry of polyethylene, 535

Kinetics, acrylonitrile polymerization in bulk, 329
  alkaline hydrolysis of pectinic acids, 385
  anomalous flow, 279

Lattice spacing, cellulose, 471
Light scattering, by globular proteins, depolarization, 408
  by polymethyl methacrylate solutions, 461

Mechanical properties and polymer structure, 565
Mechanochemical systems, theory, 499
Melting of cellulose nitrate, 179

Methyl group content in polyethylene, new analytical band, 402
Molecular weight determination, viscometric, solvent choice, 167
Monolayer studies of ethoxylin resin adhesives, 355

Neoprene, crystallization, 235
infrared analysis of configuration, 251
Nylon, 66, thermal degradation, 175
filaments, time-dependent force–temperature behavior, 182

Optical rotation, proteins, 427
Osmotic pressure, mixed acidic and basic polymers, 486

Pectinic acids, kinetics of alkaline hydrolysis, 385
Photopolymerization of styrene, 123
Polyampholytes, 57
Polybutadienes, prepared with cationic catalysts, microstructure, 325
prepared at high pressures, microstructure, 321
prepared at high temperatures, microstructure, 229
Polyelectrolyte solutions, electrostatic free energy, 43
strong, theory, 93
Polyethylene, crosslinked by ionizing radiation, 410
infrared absorption band, 511
infrared spectrophotometry, 535
new analytical band for methyl group content, 402
resin, solubility characteristics, 549
terephthalate film, isolation of a cycle trimer from, 406
thermal degradation, 185
Polyhexamethylenadipamide, viscous behavior, 589
Polyisobutylene, rheology, 371
Polyisoprenes, prepared with cationic catalysts, microstructure, 325
prepared at high pressures, microstructure, 321
prepared at high temperatures, microstructure, 229
Polymethyl methacrylate solutions, light scattering, 461
Polymethylstyrenes, x-ray diffraction patterns, 189
Polyphenylbutadienes, qualitative infrared analysis, 477
Polystyrene, thermal degradation, 185
Polyvinyl chloride gels, elastic properties, 207
Poly-4-vinylpyridine, viscosity at low gradients of flow, 85
Poly-*p*-xylylene, preparation and properties, 137
Proteins, globular, light scattering by, 408
optical rotation, 427

Radiation, ionizing, polyethylene crosslinked by, 410
Rate, and reciprocal degree of polymerization, 122
constants, polymerization reactions, 417
of shear dependence of solution viscosity, 414
Reciprocal degree and rate of polymerization, 122
Replica polymerization, 317
Reverse polymerization processes, boundary conditions, 403
Reviews
Formaldehyde, 2nd ed., J. Frederic Walker, 192
Mathematical structure of the theories of viscoelasticity, Bernhard Gross, 319
The collected papers of Peter J. W. Debye, 548.
Organic analysis. Volume I. Editorial Board: John Mitchell, Jr., I. M. Kolthoff, E. S. Proskauer, and A. Weissberger, 588
Quantitative organic analysis via functional groups, 2nd ed., Sidney Siggia, 588
Rheology, polyisobutylene, 371
Rubber, applied force and second-order transitions, 157

Second-order transitions, and applied force of rubber, 157
temperatures, butadiene copolymers, 295
Sedimentation experiments, effect of solvation, 460
Silicone coatings, effect on denaturation of egg albumin, 301
Solubility, characteristics, polyethylene resin, 549
of gases and vapors in crosslinked polymers, 131
Solvation, effect on sedimentation experiments, 460
Solvents, choice for viscometric determination of molecular weights, 167

Stream, free falling, photopolymerization of, 123
Stretched macromolecules, electrostatic free energy of polyelectrolyte solutions, 43
Structure, polymers, and mechanical and electrical properties, 565
Styrene free radical, half-life, 123
Styrene-vinyltoluene copolymer sulfonic acid, viscous and electrochemical properties, 263

Thermal degradation, polystyrene and polyethylene, 185
66 nylon, 175

Ultrasonic waves for degradation of long chain molecules, 441

Vinylene carbonate copolymers, 405
N-Vinylpyrrolidone–water, 187
Vinyltoluene-styrene copolymer sulfonic acid, viscous and electrochemical properties, 263
Viscosity, for determination of molecular weights, choice of solvent, 167
in polyhexamethylenadipamide behavior, 589
poly-4-vinylpyridine, 85
solution, rate of shear dependence, 414

X-ray diffraction patterns, polymethylstyrenes, 189
X-ray study, ethylamine-cellulose decomposition product, 193
p-Xylene as starting material for polyhydrocarbons, 3
